

## Your ZyXEL P-630-S USB Modem Setup Guide

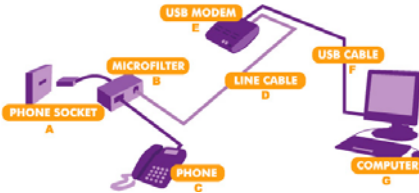

### Your Starter Pack Contents:

1 x ZyXEL P-630-S USB Modem 1 x Line Cable (grey)  
1 x USB cable 2 x Microfilters 1x Modem Installation CD

- 1 Plug a microfilter (B) into your telephone wall socket (A).
- 2 Plug your phone (C) into the microfilter's phone socket (B).

### Setting up your modem

**All devices connected to your phone line must use a microfilter (B). This includes fax machines and Sky TV boxes.**

- 3 Close all programs and applications on your computer.
- 4 Insert the modem installation CD in your computer. If the setup does not run automatically, double-click Autorun.exe from the CD. Click Setup on the main window.
- 5 Click 'P-630-S1 Windows Driver' if you're using Windows 2000 or later to start the connection wizard.  
Windows 98SE users, click 'DUN for Windows 98SE'. Select 'Yes' when prompted to install DUN 1.4 (You may need your Windows 98 disk). Reboot your computer once the installation has finished and click 'P-630-S1' Windows Driver to start the connection wizard.
- 6 You will be prompted to connect your modem. Attach the modem (E) to your computer (G) with the USB cable (F).
- 7 The install window will confirm when the installation has finished. Click OK.
- 8 Plug the line cable (D) into the DSL socket on the modem (E) and the DSL socket on the microfilter (B). The DSL LED will turn a steady green when there is a connection.

- 9 The broadband status icon (two computers) will appear in the system tray, usually in the bottom right of the screen. Double click the icon (fig 1).

(fig 1)

- 10 Select 'PPPoA' from the 'Installed Profile' dropdown list. Click Reinstall.

- 11 The 'adsl' dial-up icon is created on your desktop (fig 2). Double-click the icon.

adsl  
(fig 2)

- 12 Enter your broadband username (this is different to your account username) and password. Click Dial.

**Your broadband username is:**

**PlusNet:** username@plusdsl.net

**Force9:** username@f9.co.uk

**Free-Online:** username@freeonline.net

- 13 Restart your computer and open a web browser, e.g. Internet Explorer.

**Congratulations, you are now connected to broadband!**
